Retro And Cool

Retro styling with a modern twist is the best way to describe the Bonneville jacket from Olympia. Constructed of DuPont Cordura with ballistic mesh panels, it offers major airflow and exceptional abrasion resistance. 3M Scotchlite trim at the sides and back ensures added visibility. Featuring removable CE Motion Flex armor at the elbows, shoulders, and back, it's also equipped with a wind- and waterproof, breathable liner jacket with a rip-stop nylon shell, rib collar, side-snap pockets, and interior cellphone pocket. Major adjustability at the waist and hips offers custom-fit detailing. Available for men and women. \$219.99. **Olympia Moto Sports, 866/473-4327, www.OlympiaMotoSports.com.**

In The R Bag

Sculpted perfectly to complement the lines of the Yamaha R1 and R6, the Axio R Series tailbag gives riders a solution for carrying additional cargo in a convenient, rear-mounted travel case. With enough room for the essentials, the internal storage compartment gets its aerodynamic looks from polycarbonate hardshell construction. Its tough nylon base holds up to the rigors of daily riding, while staying in place with its onboard security strap. Riders can also take the tailbag on the go with the built-in shoulder strap. Available at Yamaha dealers and select retailers, it comes in matte black and carbon weave finishes. \$159.95. **Axio, 760/557-0123, www.AxioBags.com.**

Breathable Boots

TCX SS sport street boots feature a microfiber upper, AIR TECH breathable lining, antibacterial midsole, reinforced polyurethane toe slider, polyurethane heel guard, shin plate, and shift pad. Available in black or white, they come with a three-color injected sole with specific grip areas. Sizes 5-14, \$199.99. **TCX, 800/421-7247, www.HelmetHouse.com.**

Brass Ring

From Hiro and all our friends at West-Eagle, this new Boltechs taillight has a polished body with a brass ring and bolts, an old-school touch that would look great on any bobber or chopper custom. A license plate bracket is incorporated, but it's not DOT approved, so apply that at your own risk. Available with standard 12V bulb, LED red lens, or LED clear lens. From \$239.95. **West-Eagle, 310/787-8577, www.West-Eagle.com.**

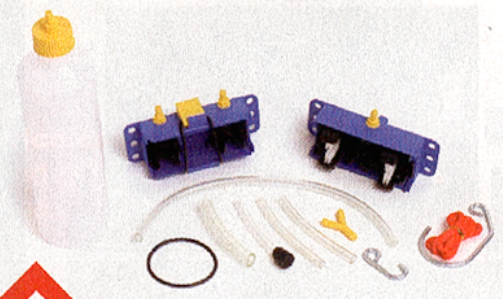

Stay! Sit!

MotoBrackets match OEM fairing brackets in fit, form, and function. Built to the same exacting specifications the OE engineers saw appropriate for your bike, MotoBrackets are a direct replacement for OE fairing brackets. Why pay for an expensive racing bracket when you can replace it with a bracket that costs about 30 percent less? Applications are available for Yamaha R1 and R6; Suzuki GSXR and TL; Kawasaki ZX6, ZX10, and ZX14; and Honda CBR600 and CBR1000. **Moto Brackets, 904/353-6452, www.MotoBrackets.com.**

Smart Gloves

Akuma delivers a new level of safety in motorcycling by introducing Street Fighter MID gloves with the CARE Memory wristband. Its flash drive technology houses a rider's medical history and emergency contact information which can then be accessed by EMS or hospitals in the event the wearer is incapacitated or unconscious. A small USB flash drive is inserted in the left gauntlet of the glove and is accessible through a small pouch labeled with an emergency ID symbol. The easy-to-use software allows the wearer to enter his medical information into the device with in-case-of-emergency (ICE) information, including blood type, emergency contacts, allergies, prescriptions, insurance info, and any other pertinent data that might be needed for immediate and effective medical treatment. \$139. **Akuma Helmets, 210/680-0059, www.AkumaHelmets.com.**

Messy Job Made Clean

Increase the life of your chain and sprockets and avoid performance-zapping grunge buildup by using the KettenMax chain-cleaning system on a regular basis. The lubricant is applied sparingly and precisely to the inside of the chain, where it is needed most, and brushed in. Just spray your lubricant of choice (not chain wax) into the rear hole using the appropriate adapter. In a matter of minutes, both the chain and pinion are cleaned and lubricated. Contaminated cleaning agents and excess lubricant is collected via a drain and can be disposed of in an environmentally friendly manner. With hardly any effort, your chain is fit for another ride, with no contamination of tires, rims, frames, or roadways. \$34.95. **Kettenmax, 208/263-0438, www.BlackDogCW.com.**
